HOCKEY TEAM WINS FROM ROCKYFORD

The Carbon hockey team triumphed over Rockyford at the local rink last Wednesday evening by a score of 2-1.

Carbon started off the scoring after 12 minutes of play when Spence notched the first goal and four minutes afterwards Hilton bulged the nets with the second tally of the game. Rockyford played strong, but could not make a counter in this period.

In the second period the play was somewhat slower, although both teams were playing fair hockey and after 13 minutes of play Rockyford scored their first and only goal of the game when Rouppe succeeded in getting the rubber by Halstead in a pass from Morrison. At the end of the second period the score was 2-1 in favor of Carbon.

The third period opened strong and was fast from start to finish. Rockyford trying to even the score and Carbon doing their utmost to hold their own. The play was somewhat ragged in this period and little combination was played by either team, this no doubt being the cause of the scoreless period. When the gong sounded the score was still 2-1 for the local boys.

The following is the line-up of the two teams:

Rockyford—Goal, Bragg; Defence, Sangster and Peters; Forwards, B. Gibson, Rouppe and W. Gibson. Subs.; Downie, Birt, Morrison.

Carbon—Goal, L. Halstead. Defence Hilton and Lynn. Forwards, Rouleau, S. Hay and B. Ramsay. Subs. Spence, Taylor and H. Edwards.

The local boys are gradually improving and as soon as the roads are opened up some good games of hockey should be seen. The Hills, Swallow and Belsaker are expected to play here in the near future and Carbon is to play at Rockyford as soon as the roads are open to that town. The boys need the local support to keep these games going and you can do this by attending the games at the rink when they are being played.

"TAKE ME HOME" TO BE SHOWN HERE FRIDAY & SATURDAY

"Take Me Home," the latest Bebe Daniels picture which will be shown at the Carbon Theatre on Friday and Saturday night, will be a delightful surprise. A surprise in the sense that Bebe Daniels has cast off the slapstick type of role for a better dramatic one, and her characterization in her new role as a stage actress was exceptionally well done.

Those of her fans, however, who like Bebe giving one of her characteristic performances in a light comedy vein will not be disappointed with her latest offering. There is comedy in the picture, and it is handled by Miss Daniels in her own excellent way. There are many light moments when the audience will be lifted with laughter proving that comedy has not been clipped out of the Bebe Daniels picture. "Take Me Home," is a comedy drama of back stage life. It is a story of a chorus girl and a love affair which brought her success.

There is a smashing climax to the story. The spectacular fight between the chorus girl portrayed by Miss Daniels and the leading lady of the show done by Lilyan Tashman is one of the classics of the screen.

There is a strong supporting cast. Neil Hamilton, as in "Hot News" is Bebe's leading man. Lilyan Tashman, Doris Hill and Joe E. Brown completes the cast of featured players.

A PRAYER FOR EDITORS

This is the "Invocation" delivered by Rev. T. D. Bateman, of the First Presbyterian Church, Columbus, Miss., at the annual convocation of the Mississippi Press Association, held in that city:

"Eternal God, our Heavenly Father, we ask thy blessing upon the newspaper people who are wont to communicate with the ends of the earth. They are people who can smell a re-

OPENING OF NEW ANGLICAN CHURCH

The opening of the new Anglican Church in Carbon will take place on Sunday next, February 2nd, when the Rt. Rev. L.R. Sherman, D.D., Lord Bishop of Calgary, will conduct the services.

Service will be held in the morning at 11 a.m. and will consist of Morning Prayer, Holy Communion and Sermon. In the evening the service will commence at 7.30 p.m. Everyone is welcome to attend these services and it is hoped that a good congregation will be present.

LITTLE ITEMS OF LOCAL INTEREST

There will be no service in the Carbon United Church on Sunday evening next, in order that the members may have an opportunity to attend the opening service of the Anglican church in this town. For the same reason the Sunday School will meet at half past two o'clock in place of eleven o'clock. This is for Sunday, February 2nd, only.

The regular monthly meeting of the U.F.W.A. will be held on Saturday, February 1st.

The Municipality have had the Caterpillar and grader out for a couple of days this week clearing the snow off some of the roads in the district.

W. A. Braisher is a business visitor to Calgary this week.

The Swallow Junior hockey team will play at Carbon on Saturday afternoon at 2 p.m.

S. F. Torrance was a Calgary visitor this week, going in on Tuesday.

It is expected that a hockey game between the Carbon Senior team and the Belsaker team will take place at the rink on Friday night at 8 p.m. Following the game will be the Hockey club dance, which promises to be the hit of the season.

Three rinks from Carbon are attending the Swallow bonspiel this week. These are, Geo. Malton, J. J. Greenan and Sandy Reid. There are twenty-one rinks entered at the bonspiel.

The financial statement of the Municipal District of Carbon has just been printed and will be mailed to all tax payers this week.

A. F. McKibbin is a visitor in Calgary this week.

J. G. Porter who was well known in Acme, has taken action against Solloway-Mills, oil stock brokers, for the sum of \$30,000.00.—Acme Sentinel.

Owing to the fact that the Carbon Bonspiel finals will come on Thursday next week, the local Elks Lodge will meet on Friday, Feb. 7th, at 8 p.m. At this meeting the installation of officers will take place.

Don't forget to be at the dance tomorrow (Friday) night.

Evolution in China, people who have license to enter the gate of princes and potentates, but who will have a mighty hard time getting inside the gates of Paradise.

"Have mercy on these people who are tempted by every devil, from the printer's devil to the devils of headlines, and these same who are so busy listening to the sounds of the wires and the songs of women that oftentimes the voice of God finds no listener among them and no place in their hearts.

"Have mercy, O Lord, upon the people who are chased by the Colonial Dames, W. C. T. U., Kiwanis and the Chamber of Commerce. Have mercy on these people who have to hobnob alike with Jew and Gentile, white and black, Democrat and Republican, Baptist, Methodist, Presbyterian and Ep-

CARBON BONSPIEL STARTS TUESDAY

The Carbon Bonspiel starts on Tuesday, February 4th and will last for three days this year. Ten local rinks will be entered and it is expected that five or six outside rinks will be here for this annual event. In the last two years the Carbon Bonspiel has attracted quite a bit of attention from the visitors and from the local townspeople and this year it is to be hoped that even more enthusiasm will prevail.

The committee in charge of the bonspiel have arranged for some very fine prizes this year and on this account the competition should be that much keener when the rinks get into the jewelry.

WILL ASK GOVERNMENT TO SUBSIDIZE RELIEF WORK

Carbon and Michichi Municipal Districts, in co-operation with Drumheller Town Council, will make application to the Provincial Government for assistance in coping with the unemployment problem of the district.

It is understood that the province will be asked to commence road development work almost immediately, as the two municipal districts are being called upon to make heavy expenditures for relief. With the Twin Hill route to Calgary still unfinished and other highways in the district requiring improvements, it is felt that this is an opportune time to proceed with the work.

It is possible that a deputation, representing the two municipal districts and the town of Drumheller will go to Edmonton in order to impress upon the government the need of assistance.

THE ANNUAL CHECK-UP

The first month of the new year and still a few of the many resolutions made are unbroken. How many people resolved to have that yearly physical check-up, and how many have had it done?

This is a quiet month for all work, indoors as well as outdoors. The head of the house is busy with those repairs or replacements to outhouse and machinery that is a preparation for the busy spring and summer months ahead, so why not have the human machine checked over at the same time and have necessary repair done there. Your body can be repaired. It can never be replaced. There are no spare parts for the human body; but it will, and does respond to fair play. Give it half the care that is expended on the cheapest automobile, and will give excellent service over a long time.

Tuberculosis and cancer, to name two diseases, can be arrested if diagnosed in the early stages. They work such havoc of suffering and sorrow if not diagnosed until too late. Will you make that appointment with your physician and take the members of your household with you? Health literature can be had free from the Canadian Red Cross Society at Edmonton.

Isopalian, those who came over on the Cauliflower.

"Have mercy, O Lord, on these people and help them in their dash from ballroom to church social and back to rum-runners, and who have to associate with anything from Andy Mellon to Andy Gump. Any of them would run two miles for a good story.

Make this a good convention in the Friendly City. It's not an easy matter to break into the Pearly Gates. We pray thy blessing upon them. When they have done with newspapers here and stories and their cares are finished here, may they have a finer story for St. Peter than ever had in newspapers here. And although it is so hard for newspaper men to get into the Kingdom may they receive a warmer welcome in Jerusalem than they do in Columbus today. Amen."

'Fresh from the gardens'

Forward, Canada!

Lying latent in the nature of almost every individual there is one human characteristic which comes to full bloom in times of excitement, emergency, or undue stress. It is the tendency to indulge in exaggeration. A crowd assembles for some particular reason and the average person estimates the number at two or three times its actual size, or an accident occurs and the report is immediately circulated that the toll of the dead and injured is many times greater than the reality.

So, too, when times are good the impression becomes general that they are better than is really the case, and a "boom" is created, speculation is indulged in far beyond what the circumstances warrant, and the end is ultimate loss, and in some cases disaster. Here in the West indications in any year may point to a fairly large and satisfactory crop yield, and the inevitable tendency is to make estimates of the yield far in excess of what the harvest reveals.

Turning to the other side of the picture, and the same thing will be found to be true. A slump occurs in business, the returns of the crop season are below the average, a degree of unemployment exists, and almost immediately the human tendency to exaggerate comes into play, and everything is painted in much more somber colors than there is any justification for so doing.

This tendency to undue exaggeration is in evidence in Western Canada today to the detriment of the whole country, and to every person resident therein. Recognizing the fact that the crop of 1929 was disappointing and below the average of many years, coupled with the further fact that the burden of the loss has to be borne by certain sections of the country which harvested little or no grain, the impression is created of a practically total crop failure, and that the country is no good. Such exaggeration ignores the splendid returns of former years, and takes no cognizance of the fact that, taken on the whole, and year after year, Western Canada has been forging steadily ahead. One swallow does not make a summer, nor does one crop shortage, or even failure, condemn a country or provide substantial ground for discouragement and depression, any more than one bumper crop establishes the fertility of any section or justifies a "boom" and extravagant expenditure.

At this time the people of Western Canada, in city and country alike, may well give consideration to, and base their actions upon, the average of conditions. If the grain crop was smaller than usual in 1929, in 1928 it was so big that it shattered all records; if the 1929 grain crop fell below the average, dairy production, in Saskatchewan, for example, increased by three and one half million pounds, a 30 per cent. increase over 1928. The figures of building construction in the West, last year, established new high records; employment was maintained at a high ratio throughout the first nine or ten months of the year, and the present slump is only seasonal and temporary, with prospects for 1930 just as bright as they were in 1929.

Let us remember that if the export of agricultural products by Canada fell off in the last half of 1929, the grain is still in Canada to be transported by our railways and sold by our people, and the results will be reflected in the business activity of 1930. Let us be encouraged by the fact that the greatest of our great Western enterprises, the Wheat Pool, has successfully contended with a set of the most difficult circumstances. It has been put to the test, but with the united support of all Canada's banking institutions and business and commercial interests generally, it is now quite evident that it is winning out in its great fight to protect the interests of Canada's great army of producers.

It is impossible in this world for any person, country, or corporation, to forever move forward, onward and upward. It is inevitable that periods of recession must interrupt such steady progress. The stock market cannot forever go on climbing higher and higher; it must take a drop some time. If the pendulum swings too far one way, it must swing back again because an equilibrium must be maintained. We cannot always live on the rarified heights; it becomes necessary at times to descend into the quiet and repose of the valleys.

The position of Canada, and of all Canadian industry, agricultural, manufacturing, commercial, is essentially sound and strong; stronger than that of almost any other country in the world. There is no justification for any depression, because no cause exists for it. To the extent that it is prevalent with some people it is largely a mental condition. Reverses have been suffered by some people in Canada as in other lands, and occasions arise in the life of every one when they meet with a reverse. But a reverse is not defeat. Courageously faced it can be turned to victory.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Air Must Be Charted

Pilots Should Know Exact Location Of High Mountain Peaks

Tragic was the fate of the two British airmen who crashed into the side of a mountain in Northern Africa, and were killed, while attempting to make a non-stop flight from England to Capetown. It is a reminder that mountains are a greater danger to airmen than rocks are to seamen.

The seas have been so travelled that almost every rock, in existence is known, charted, and in some way marked by signs at night. Except for what earthquakes may do by changing the configuration of the bed of the ocean, there is probably no voyage that any ship can make without being fully prepared to avoid submerged rocks.

The air routes will have to be marked out in the same way. This is not the first time that aviators have come to grief through hitting a mountain.

The route to South Africa is across varied terrain. These airmen may have been flying thousands of feet high and felt they were quite safe, forgetful of the peaks which rear their heads far into the clouds.

Long distance passenger planes are to increase rapidly, and the pilots will have to be provided with charts which will show them how high they must fly along the routes in order to avoid hitting a mountain.

Smothering Spells Couldn't Walk Far Gasped For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath. A friend told me to try

which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Record Of Flying Clubs

Canada's Airmen Had 15,400 Flying Hours Last Year

Members of Canada's 23 light aeroplane clubs flew 15,400 hours during 1929, figures released by the civil aviation branch of the Department of National Defence show. This flying time is equivalent to 1,232,000 miles, and is nearly twice that flown in 1922. Total membership of the clubs is 5,092. At the end of the year there were 396 solo fliers, while 165 private pilots and 58 commercial pilots had graduated from the student ranks of the clubs.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

Putting Radio To Test

Soviet Radio Station Converses With Byrd's South Polar Party

Over 12,420 miles of sea and land—the northernmost and southernmost outposts of civilization—conversed recently by radio.

The Soviet radio station in Franz Joseph Land, compared weather with Rear-Admiral Richard E. Byrd's south polar party.

The Soviets described an Arctic dawn, and the Americans replied with a description of an Antarctic night-fall.

Byrd asked the Russians concerning progress of the search for Capt. Carl Ben Eielson, American aviator-explorer, lost in the Alaskan Arctic since Nov. 9.

Minard's—The Great White Liniment.

W. N. U. 1822

Restless Children

Children will fret, often for no apparent reason. But there's always one sure way to comfort a restless, fretful child. Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than some powerful medicine that is meant for the stronger systems of adults.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is any need. In cases of colic, diarrhea, or similar disturbance, it is invaluable. But it has everyday uses all mothers should

understand. A coated tongue calls for a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed to set everything to rights. Genuine Castoria has Chas. H. Fletcher's signature on the wrapper. Doctors prescribe it.

Heavy Charge On Industry

Fires Are Costing Canada Almost One Hundred Million Annually

Fires cost Canada approximately \$100,000,000 yearly, according to a statement issued by the Canadian Chamber of Commerce in an effort to introduce to chambers and boards throughout the country a composition designed to lower this heavy charge on industry.

Business bodies have been classified into four sections determined by population, and a shield will be awarded by the chamber in each section for the organization showing the greatest reduction in fire loss, the most educational activity along fire prevention lines, and the most permanent structural and protective improvements.

The formation of large hailstones begins at heights estimated at between 15,000 and 40,000 feet above the ground.

The river systems of the earth are estimated to carry to the ocean each year about 6,500 cubic miles of water.

Use Minard's for Neuralgia.

The lowest point for thousands of miles of the Andes is 10,000 feet above the sea.

Award For B.C. Astronomer

Gold Medal Won By Director Of Dominion Observatory, At Victoria

The gold medal of the Royal Astronomical Society has been awarded to Dr. J. S. Plaskett, director of the Dominion Astro-Physical Observatory, at Victoria, B.C., it has been announced. Dr. Plaskett earned this high award for valuable observations of stellar radial velocities and important conclusions derived from these observations. The Victoria scientist has accepted the Society's invitation to hold the post of George Darwin, Lecturer for 1930, in England.

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passage tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily benefiting cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Marie: Is it true that Margaret has a secret sorrow?

Anna: Why, yes; hasn't she told you of it?

Mahogany trees do not reach their full height until they are 200 years old.

Needless Pain!

People are often too patient with pain. Suffering when there is no need to suffer. Shopping with a head that throbs. Working though they ache all over. And Aspirin would bring them immediate relief!

The best time to take Aspirin is the very moment you first feel the pain. Why postpone relief until the pain has reached its height? Why hesitate to take anything so harmless?

Read the proven directions for checking colds, easing a sore throat; relieving headaches and the pains of neuralgia, neuritis, rheumatism, etc.

You can always count on its quick comfort. But if pain is of frequent recurrence see a doctor as to its cause.

BEER AND BOOTLEG

Abolition of beer rooms will be
featured on the programme of the Al-
berta Prohibition Association at their
24th Annual Convention early next
month. In the current issue of "The
Searchlight," a call is made to those
who are opposed to the beer room to
express themselves at every opportu-
nity—so we take this opportunity of
registering our objection—to the Al-
berta Prohibition Association.

It is our opinion that the beer par-
lor is less of a social evil than the
prohibition organizations. Prohibition
has brought its full quota of evils and
we are ready to place at the doors of

the prohibitionists the responsibility
for the increase of canned-heat ad-
dicts, dope fiends, moon-shiners and
the bootlegger who now has developed
into a notional institution.

Only when the beer parlors are
closed do the bootleggers open—they
cannot compete with the legalized
sale of beer, yet the Alberta Prohibi-
tion Association blames an alleged in-
crease in bootlegging to the existence
of beer parlors.

We are in favor of strict supervi-
sion of licensed premises where intoxi-
cants are sold—we believe that Alber-
ta has a reliable system for the con-
trol of beer parlors and so long as
this system remains uncorrupted we
shall continue to favor existing condi-
tions.

The prohibitionist says that beer
parlors and bootleggers go hand in
hand—we say beer parlors or boot-
leggers—take your choice.

—The Drumheller Mail

SHORT SIGHTED

The Gleichen Call on January 8th
issued this statement: "The Call was
not published last week owing to the
fact that the business men of the
town claim they could not afford to
advertise. This may appear a strange
statement in these modern days when
the big majority of successful busi-
ness men claim they cannot afford
not to advertise at every opportunity."

This candid explanation from the
publisher of the Gleichen paper em-
phasizes again the well-known fact
that without advertising a newspaper
cannot flourish, in fact the machinery
stops running.

The local paper is a mirror of the
community and business spirit of any
town, and if the mirror does not pre-
sent an attractive picture, so much
the worse for the community. There

must be co-operation.

The fact that the Gleichen paper
was obliged to suspend publication
even for one issue, reflects on the
business enterprise of the town. It
proves once more, that the business
men cannot afford not to advertise.

—Vulcan Advocate.

THE ROARIN' GAME AND THE GAME OF LIFE

(Continued from back page)

groups of manly men seldom end in
trouble.

Now the principles that I have re-
ferred to as applying to the game of
curling apply with equal force to the
game of life. In the game of life one
of the most disturbing elements we
have to face is that men differ in their
general make up; their adaptability;
their disposition, etc. They start under
different conditions; some under great
handicaps. This problem I will not at-
tempt to discuss. When there is a clear
field, and equal opportunity, there is
one consideration which needs to be
observed in the game of life which is
very firmly set down in the rules that
govern the game of curling, that is
that you must not mar the running
stone. Remember that into that run-
ning stone the player has put all of
himself, his strength, his skill, his
judgement, and his fondest desire to
win. It would be cruel to deflect that
stone in the slightest degree, and thus
defeat the honorable intention of the
player. It is no wonder that the rules
of the game are rigid on this point.

You can easily see its application to
the game of life. Here as in the other
you find every man desirous of doing
his best. Would it not be criminal to
turn a man from his purpose, to de-
fect his aim even ever so little and
thus destroy the result intended. We
sweep a stone often to help it on its
way. If we do nothing more we at
least remove out of its path of pro-
gress all particles of frost and snow
and dust such as would tend to hin-
der its passage toward its goal. Do
we not see that in the game of life a
man puts all of himself; his strength;
his skill; his judgement; and his fon-
dest desire to win, not only for his
own sake, but also for the sake of
all dependent on him, I ask again, is
it not criminal to deflect a human life
from its great purpose, "Thou shalt
not mar the running stone." There
are many ways in which we can mar
a running stone. We can mar it even
before it is delivered. While the play-
er is still standing with his foot in

the hack, waiting to deliver it, any-
thing said by an opponent to cause
a laugh; to distract attention; or to
shake the nerve of the player, will
mar the running stone. No true curler
would ever allow himself to do any
of these things. Every man ought to
be allowed to stand in the strength
of his own personality and do his
best. The same manly stand ought
to be taken by all in the game of life.
What a pity that the rule is far from
being adhered to by many. How often
people are swayed and turned from
the great purpose which they were
aiming at by the thoughtless remarks,
and sometimes sneering innuendoes as
well as by the demeaning seductions
of thoughtless companions. Oh how
often a good resolution is frustrated
by someone throwing something in the
way. We sweep the dust and snow-
drift out of the way of a running
stone. We want the aim of the player
to reveal itself, and his skill to mani-
fest itself in the action of the stone;
but in the greater, and much more
important game of life, we are not al-
ways so anxious to further the inter-
ests of the players. Oh how full life
is of things that mar—that impede
progress. Let us sweep them all out
of the way, and make it as easy as
we can for every man to win.

(Concluded Next Week)

BRIDGE PLAYER HAS THIRTEEN HEARTS AND THEN BIDS DIAMONDS

Bosworth, Mo.—In the niche of the
hall of fame occupied by Royal Reig-
els and Fred Merkle, place Wes. Staf-
ford, hardware dealer, Stafford drew a
perfect bridge hand in hearts—and
bid diamonds.

His hand was "all red," so Stafford,
the dealer, bid one diamond without
inspecting his cards closely, "just to
get the game started." The other three
players passed. When Stafford looked
again at his hand he found 13 hearts.
He laid the unplayed hand on the
table. Comment of Mrs. Stafford, his
partner, is not on record.

It surely was a good thing for Mr.
Stafford that he was not paired off
with some of Carbon's bridge sharks,
for without a doubt, he would have
been a candidate for the undertaker.

HAVE YOU PAID YOUR SUBSCRIP-
TION YET? NOW IS THE TIME

SIX MILES A MINUTE

Hurting through space at the most
terrific speed ever attained by man,
Capt. R. H. Orlebar of England re-
cently set a new record of 368 miles
an hour, or more than six miles a
minute, flying a racing seaplane.

Other seaplane records made by
ranged from 328 to 351 miles an hour,
all of which far exceeded previous re-
cords. Orlebar's record was made in
the plane that won the famous Schnei-
der cup a few days before by covering
a 217 mile course at the average speed
of 328 miles an hour. The rapid ad-
vance in seaplane speed in recent
years is indicated by the fact that the
winner of the Schneider cup in 1913
made only about 45 miles an hour,
while in 1920 the winner's speed was
but 102 miles.

It is difficult to imagine ones self
dashing through the air at the rate
of more than six miles a minute. If
the speed could be maintained with-
out stopping, the distance covered by
the Graf Zeppelin in its recent trip
around the world could be made in
about 55 hours, or a little more than
two and a quarter days.

The idea of such a feat may appear
fantastic, but Jules Verne's idea of
a trip around the world in 80 days
appeared fantastic less than 60 years
ago. Yet the Graf Zeppelin made it in
21 days, with less than 12 days con-
sumed in actual flying.

We Print

Letterheads, Note Heads, Envelopes,
Loose Leaf Account Forms, State-
ments, Bill Heads, Tax Receipts and
Notices, Firm Cheques and Vouchers,
Mine Forms of all Descriptions, Cards,
Tickets, Posters, Auction Sale Bills,
Etc. In fact everything that is Print-
able, we can print.

The Carbon Chronicle has printing
equipment equal to most of the large
city shops and is capable of turning
out work of quality and distinction at
reasonable prices. This is all that you
can ask and we are making a bid for
ALL your printing requirements.

We are capable of doing the work.
You can at least give us a trial before
going to outside concerns for your
printing matter.

Who Does Your Printing?

All business houses need more or less printed matter, all of which
is within the possibilities of the local printer. Yet how prone
many are to pass up the home printer and let the orders go to
city offices which have no interest whatever in rural communities
except to get printing orders and the cash to pay for them. Busi-
ness men, remember that the home paper is constantly promot-
ing the interests of the home community and you owe it to your-
self and your local paper to back up these efforts by at least hav-
ing your printed matter done locally.

WORLD HAPPENINGS BRIEFLY TOLD

A search is now being conducted for an old post of the Hudson's Bay Company, and the fort of the Northwest Company which once stood close to the Saskatchewan River, about 80 miles north of Saskatoon.

Hon. P. J. Cashin, Minister of Finance in the Newfoundland Government, told the Canadian Press that Newfoundland would balance its budget this year for the first time in a decade.

Owing to the increase in the number of cheques drawn by persons who have not sufficient funds on deposit to meet them, the banks of Ottawa have decided to make a charge of 50 cents for every such cheque issued hereafter.

Commissioner George Mitchell, international secretary for the Salvation Army's work in Europe, and in the British Dominions, died recently in London. He began his career with the Army as a messenger boy more than 40 years ago.

Executors of the late Gen. Bramwell Booth, former Salvation Army head, have been ordered by the chancery court to turn over to General Higgins, who now heads the Salvation Army, property valued at £1,000,000 (\$5,000,000).

The beacon light of Brandon Aero club has been put into operation. It is one of the first in Western Canada, and it will be used to guide night fliers, not only on the regular air mail routes, but other airmen as well. Its flashing rays can be seen for miles.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin, soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Discovers New Drug

Having all the antiseptic properties of iodine, but not stinging when applied to open wounds, a new drug has been discovered by Professor Hans Friedenthal, a physiologist of the Berlin University. He has named the new antiseptic "metajodin," which is said to be made by combining iodine with oxygen.

Sores Heal Quickly—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Eclectric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where properly applied.

Made Poor Job Of It

During a recent wedding, the bridegroom fainted, but the ceremony proceeded after a delay of twenty minutes. A cynical correspondent says that the bridegroom evidently hasn't learnt how to faint thoroughly.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver.

Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

W. N. U. 1822

What Year Is This?

May Be Even Later Than We Are Dating It

Although the past year is recorded as 1929, it may really be, says an article in Tit-Bits, 1933, or even later. This fact is indicated by a record of an eclipse of the moon. Bible history says that Christ was born during the reign of Herod the Great. But Herod died in the spring of 4 B.C., the next date being fixed by a lunar eclipse which took place the night before his death. Obviously, therefore, Jesus must have been born not later than 4 B.C., and possibly earlier. The Church had no definite knowledge of the date of Christ's birth. It fixed the year, month, and day of the month arbitrarily. Astronomers are able to calculate the dates of past eclipses as accurately as those of the future, and so have determined the very day and hour of the eclipse that ushered Herod the Great out of this life.

THIN-BLOODED PEOPLE ALWAYS FEEL COLD

To Withstand the Rigors Of
Winter the Blood Must Be
Rich and Pure

Thin-blooded people easily become discouraged. They lose strength; grip, influenza and ordinary winter colds seize them and they find it exceedingly hard to shake off any of these troubles. They feel chilly all the time; their nervous system becomes a wreck; they cannot sleep and life becomes a burden.

To overcome this deplorable state of health good blood is essential. This good blood gives warmth to the body; strength to the nerves and does much to either prevent colds and grip or to banish their dreaded after-effects. Dr. Williams' Pink Pills is the perfect blood builder—they never fail to make new, rich, red blood. They are the ideal tonic for winter use. Concerning their use Miss Kate L. Grant, Merlin, Ont., writes:—"I was very much run down but found health and strength through the use of Dr. Williams' Pink Pills after other medicines had failed to help me. Two years ago I felt tired all the time; had no appetite; was nervous and cold all the time. Nothing I took seemed to do me any good till I began the use of Dr. Williams' Pink Pills. After a short treatment with them the draggy feeling left me; my appetite improved; my blood became warmer and my strength gradually increased. This encouraged me to continue the use of the Pills and now I am feeling better than I have done for years."

Dr. Williams' Pink Pills do one thing but they do it well—they build up and renew rich, red health-giving blood thus making weak, run-down men and women strong, active and happy. These Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sunlight and Health

Ultra-Violet Rays Are Necessary To
Life and Health

Have you ever noticed your lawn where a board or flower-pot has lain for a few days. The grass will be yellow and will eventually turn white or die. It is the lack of sunlight and the ultra-violet rays which are necessary to the health and life of plants as well as human beings, animals and birds.

Poultrymen have discovered that the ultra-violet rays of the sun prevent leg weakness and other diseases, and promote growth in a marvellous way. Unfortunately ordinary glass does not allow these vital rays to pass through it with the red and other rays which we know as sunlight. However there is a glass substitute called "Windolite" which is flexible and yet unbreakable and that allows full penetration of these important ultra-violet rays. Up until a few years ago, turkeys were difficult to raise in confinement, but with the brooder houses fitted with "Windolite" they thrive as well as in natural sunlight and get a splendid start in life before they are allowed outside, especially when the weather is cold and wet.

"Windolite" is now being used extensively all over Canada for poultry houses and dairy barns as well as sun rooms, and in hospitals, and sanitariums, where sun baths are a regular part of the treatment of certain diseases.

British Columbia Salmon

Salmon canned in British Columbia is exported to over thirty countries in the world. The annual marketed value of the B.C. product is more than \$13,000,000.

SUNDAY SCHOOL LESSON

FEBRUARY 2

PUTTING GOD'S KINGDOM FIRST

Golden Text: "Seek ye first His kingdom, and His righteousness; and all these things shall be added unto you."—Matthew 6.33.

Lesson: Matthew 6.1-34.

Devotional Reading: Psalm 145.1, 2, 7-13.

Explanations and Comments

Genuine Charity, verses 1-4.—"Ye therefore must be perfect, even as your heavenly Father is perfect" are the closing words of Chapter V. of Matthew, our lesson of last week. The citizens of the new kingdom must excel the Scribes and Pharisees in righteousness. Matthew next records Jesus' words about almsgiving, prayer, and fasting—three forms of good works of which the Pharisees boasted. Jesus emphasized the fact that righteousness is a transaction between man and his Heavenly Father, and into it no thought of what others may say or think should enter. Almsgiving, charity, that is genuine will not be given in order to receive the praise of men.

Genuine Prayer, verses 5-8.—The Jews had certain times for prayer, and wherever a man was when the prayer hour arrived, there he stood and prayed. Some there were, hypocrites, Jesus called them, who deliberately planned to be found at prayer time in conspicuous places in synagogues, or at street corners. It was the appearance of righteousness that they coveted, not the righteousness itself; they sought to gain a reputation for piety just as Ananias and Sapphira tried to gain a reputation for generosity and self-sacrifice when they were far from possessing either quality.

Verily I say unto you, They have received their reward. The Greek word means "received in full," and is the one used in drawing up receipts. They have received the full reward which they sought, they have been seen of men, they have no claim whatsoever to any further reward.

You can best talk to your Father in Heaven when you are by yourself. When you pray, counseled Jesus, shut out the world and shut yourself in with God—enter into thine inner chamber, your secret place where you can be alone with God, and having shut the door, pray to your Father who is in secret. For Nathaniel the place for prayer was under the fig tree; for Peter it was on the housetop. Jesus, Himself, made the mountainside and the garden His closet, the places where He could have privacy to commune with God. Jesus is not disparaging public prayer, which He elsewhere commends; He is emphasizing the test of sincerity which private prayer affords.

And thy Father who seeth in secret shall recompense thee.

Royal Bank Annual Meeting; Assets Exceed Billion Dollars

The annual meeting of shareholders of The Royal Bank of Canada not only marked the close of the most successful year on record, but was rendered specially interesting by constructive addresses delivered by Sir Herbert Holt, president; C. E. Neill, vice-president and managing director, and Morris W. Wilson, general manager.

Sir Herbert, in addressing the shareholders, pointed out that in spite of the losses incurred by thousands of investors throughout Canada and the United States, the strength of the business structure is such that there is no reason to look forward to more than a moderate recession in business during 1930.

Dealing with conditions in Canada, Sir Herbert stressed the fact that neither the prospects in foreign trade nor the situation in Canadian industry, trade and agriculture, warrant pessimism concerning the outlook for the coming year.

Industrial Advisory Council

After dwelling on the success obtained by President Hoover in securing the active co-operation of industrial leadership throughout the country in the recent crisis, Sir Herbert urged that it would be to the advantage of Canada to establish a non-partisan Advisory Council, composed of men of outstanding ability, representative of industry, agriculture and labor. This council would bring about a closer approachment between government, industry, agriculture and labor that would assist the

formulation and execution of effective measures for the maintenance of that equilibrium which would ensure stable prosperity.

Vice-President's Address.

C. E. Neill, vice-president and managing director, submitted to the meeting a very interesting proposal by which Canada might benefit to a far greater extent from the tremendous tourist traffic that is coming annually into the country from the United States.

"Canada," said Mr. Neill, "is attracting approximately fifteen million visitors a year. This great annual migration presents an unparalleled opportunity for increasing our trade. As yet there has been no concerted effort to build the tradition that there are purchases which can be made in Canada more advantageously than in the United States. If we could make purchasing in Canada sufficiently attractive, it would make a difference of more than one billion dollars a year in our trade."

General Manager's Address.

Morris W. Wilson, general manager, reviewed the 60th annual report and balance sheet, for the year ending November 30. The figures, both of assets and profits, constitute a new record for Canadian banking. Total assets of \$1,001,442,741 are shown, being an increase of \$92,046,856 for the year. Deposits have gained \$64,620,923 and now stand at \$772,067,768.

Pay Big Dividends

About Two Hundred and Fifty Millions Paid To Stock Holders In Canadian Corporations

Approximately \$250,000,000 was paid in dividends to stock holders in Canadian corporations in 1929, according to an estimate based on actual disbursements of more than 500 securities listed on the Canadian stock exchanges and others widely held by the general public.

During the year a number of bonuses or extra cash dividends were also paid. In the final three months of last year about \$10,000,000 was added to regular quarterly dividends.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

"The African is the only happy human I have come across," said General Smuts, at Oxford, recently. "No other race is so easily satisfied, so good-tempered, and so care-free."

Dentist: "Which tooth do you want extracted?"
Pullman Porter: "Lower seven."

The area of the world which boasts the least illiteracy is western Europe.

Missed a Fortune

Ignorance Of Geology Was Costly For Prospector

How a fortune was missed as the result of a Gold Coast prospector's ignorance of geology was revealed by Sir Albert Kiltson at the recent meeting of the British Association. The prospector in search of gold dug a hole and unearthed manganese ore. Thinking it was iron ore, he took no notice of it. A geologist found the old hole and realized the value of the ore. The spot has since proved to be one of the largest and richest deposits of manganese ore in the world.

Port Arthur's Population

Port Arthur's population, according to the assessment commissioner, is now 20,092, or an increase of 730 over last year.

FEDERAL AID IN DEALING WITH UNEMPLOYMENT

Ottawa.—If the provinces of Canada join together in admitting that they cannot cope with the unemployment situation, the Dominion Government is prepared to discuss remedial measures with them, Premier MacKenzie King told a large delegation from the Trades and Labor Congress.

The Prime Minister added that the financial position of some of the provinces did not indicate that they were unable to cope with the situation, especially as it appeared to be largely seasonal. Unemployment, in the first instance, said Mr. King, appeared to be a municipal responsibility.

If it became too serious for the municipalities to handle, their appeal lay to the provincial government. If the province found that it could not cope with it, the problem became a national one, and the Dominion Government would expect to be asked to assist in solving it. But, in the absence of an admission by all the provinces that they were faced with a problem which they could not meet, the Dominion Government did not feel called upon to take action.

Both the Prime Minister and Hon. Peter Heenan, Minister of Labor, dealt with the unemployment situation. Mr. King informed the delegation the government has been pursuing a policy of keeping men employed on government contracts at work.

Both Mr. Heenan and Mr. King referred to the demand for a national unemployment conference.

Mr. Heenan insisted that he had not given the impression in his statements that he was unaware of unemployment. He knew there was unemployment, but he felt the calling of a national conference would exaggerate its importance in the public mind and perhaps accentuate the situation.

This was the view expressed by the Prime Minister. Mr. King made it clear that Mr. Heenan had voiced not merely his personal view of the matter, but the opinion of the government on the unemployment question.

Reporting Naval Conference

World Will Receive News Through Four Hundred Correspondents

London, England.—The world will receive news of the five-power naval negotiations through nearly 400 newspaper correspondents accredited to the conference, who will have offices in St. James's Palace throughout the proceedings.

An historic room of the palace, the guard room, where tradition has it King Charles I. slept the night before he was beheaded, is the local point of a network of cable and telephone communications extending to the four corners of the globe.

Press wires run direct into St. James's Palace for the use of a special corps of staff correspondents representing the Canadian Press, the Associated Press, and other press services, while direct telephones also are available for everything from local calls in London to trans-Atlantic calls.

Left Small Estate

Liverpool, England.—The estate of the late "Tay Pay" O'Connor, dean of the House of Commons, eminent writer and journalist, proves of a value of only \$1,500. This was forecast by the Canadian Press at the time of his death. The gold snuff box, presented by members of the House of Commons, is left to the House of Commons. His portrait by Beacon is left to the Walker Art Gallery, here. No provision is made for his wife, but she is otherwise well provided for.

Missing Plane Found

Dieppe, France.—Five persons were killed when a taxi-aeroplane crashed against a cliff near Dieppe. Four of the dead were passengers and the fifth was the pilot. The plane had been missing for two days, and it was assumed the smashup came in the recent storm.

Ninety per cent. of Russia's army is composed of peasant boys.

W. N. U. 1822

Habeas Corpus Writ

Application Of Harry Bronfman Granted By Supreme Court

Ottawa.—A writ of habeas corpus was issued by the Supreme Court of Canada on application of Harry Bronfman, wealthy liquor dealer of Montreal, who is under indictment before Saskatchewan courts on charges growing out of alleged liquor transactions. The writ is returnable on February 1, on which date Bronfman will be brought before the Supreme Court.

Saskatchewan authorities will then be required to show cause for his detention.

This is stated by court officials to be the first time in 25 years that a writ of habeas corpus has been granted in the Supreme Court.

The motion was made in Chambers to Mr. Justice Duff. Counsel included Eugene Lafleur, K.C., and Gregory Barclay, K.C., both of Montreal, and A. G. MacGillivray, K.C., of Calgary. As the application was exparte no one appeared on behalf of Saskatchewan authorities.

The prosecution is defective, Bronfman's counsel contended, because the charge is laid under the Criminal Code, when it should have been laid under the Customs Act. Furthermore, if laid under the Customs Act, the prosecution could not succeed because the charge would be outlawed. The Customs Act requires that charges must be laid within three years of the time the alleged offence was committed.

Eleven Killed In Crash

Ohio Has Fourth Bus Tragedy In Three Weeks

Cleveland, Ohio.—Ten children and a bus driver were killed at Berea, Ohio, near here, when the bus was hit by a New York Central mail train bound for Chicago, at the Sheldon Road crossing, near Berea. Three other children, seriously hurt, were taken to the Boca hospital.

Cause of the tragedy was not explained. Weather conditions were clear, and officials were unable to account for the driver's failure to see the train.

Most of the victims were small children who attended from the first to the sixth grades.

The bus was said to have been carrying between 15 and 20 children.

The crash was the fourth bus tragedy in Ohio in the last three months.

Kept Link Unbroken

Radio Engineer Used His Body As Current Splice

New York.—His arms twitching with shocks from electric current, Harold Vivian, a young radio engineer, literally spliced with his body a broken link in the vast hook up and made it possible for listeners-in of 59 North American radio stations to hear the King's speech at the naval conference.

Just before the King began somebody in the control room of the broadcasting company tripped over the wires of the generator. Vivian grasped the wires together in his hands to restore the circuit. Leakage of current through his body to the floor shook his arms without a break, for 20 minutes until new wires could be connected.

Mountie Wins Promotion

Inspector W. W. Watson Will Be Stationed At Lethbridge

Ottawa, Ont.—The promotion of Sergeant-Major W. W. Watson to rank of inspector has been announced here at headquarters of the Royal Canadian Mounted Police.

During his 20 years of service with the force Inspector Watson has been stationed at various points in Western Canada and in the Capital. He served here in the Bureau of Criminal Investigation. Inspector Watson will now be stationed at Lethbridge, headquarters for the southern Alberta District.

Quebec's Minimum Wage

Quebec, Que.—A minimum wage for women workers in the province of Quebec, outside the city of Montreal, has been adopted by the minimum wage commission, stipulating that workers with two years' experience should be paid at least \$10 per week. Apprentices will receive \$6 per week, with the rate increased by one dollar each six months.

WAS PEACE ADVOCATE

Edward W. Bok, editor, author, philanthropist and earnest advocate of international peace, who died at his home in Lake Wales, Florida, recently at the age of 66.

Letter Carriers Ask For Higher Salary

Civil Service Commissioners Promise Delegates To Consider Request

Ottawa.—Serious consideration was promised by the civil service commissioners to requests for higher salary schedules for all letter carriers presented by a delegation.

The delegation presented data showing salaries paid in comparable employment, and discussed various sides of the question with the commissioners. The matter of increases in mail carriers' salaries occasioned a considerable amount of discussion in the last session of parliament. Hon. P. J. Veniot, postmaster-general at that time expressed himself in sympathy with the carriers' position, but pointed out the matter was purely one for decision by the civil service commission.

Sealed Letter Destroyed

Lawyers Burn Envelope Containing Name Of General Booth's Nominee

London, England.—The Daily News says that the sealed envelope containing the name of the late General Bramwell Booth's nominee to succeed him as head of the Salvation Army, was burned unopened by the solicitor of the Army, in the presence of several commissioners.

The envelope had figured prominently in the discussions of Army affairs leading up to the removal of General Booth a year ago. Many guesses had been made as to the identity of the man whom the general believed best fitted to succeed himself.

Lloyd George Missed Speech

London, England.—Rt. Hon. David Lloyd George was left out in the fog while the King delivered his address at the opening of the naval conference. The Liberal leader, and wartime premier, needed an hour and three-quarters to make the short journey and missed the plenary spectacle altogether.

Will Sell Power Plant

Moose Jaw Burgesses Decide To Sell Franchise To American Concern

Moose Jaw.—After a quarter of a century of municipal ownership, the city of Moose Jaw consented to the sale of its electric light and power plant to the Iowa Southern Utilities of Delaware, Davenport, Ia., by a sweeping vote of over three to one. The number of burgesses voting for was 2,250, and the number against, 744, a two-thirds majority being required for the by-law to carry.

By the passing of this by-law, subject to ratification by the Saskatchewan legislature, the largest power transaction in the history of the province will have been completed. Involved in the offer which has been accepted by the city is a sum in the neighborhood of \$3,500,000, the largest single sum of money to be offered for any public utility in the province.

The voting brings to a close one of the bitterest fought battles in the city's history, the power situation having been a bone of contention and discussion for over 12 months. The Board of Trade supported the sale; the local press opposed it.

Canadian Boat Rammed

United States Coastguard Vessel Said To Have Pursued Vancouver Motor Boat

Vancouver.—The new Vancouver deep sea motor boat "Taiheyo Maru" was rammed by the United States coastguard vessel "Bonham" on January 17, and has been beached on one of the Guadalupe Islands, off the Mexican coast, according to advices received by the vessels owners here. A protest has been sent to Ottawa concerning the incident.

Captain J. Butler, master of the "Taiheyo" states that his vessel was in ballast, bound for home when she was pursued and run down by the "Bonham." She had no liquor on board nor had carried any on the trip, he states.

Sheep Breeders Of Saskatchewan

Officers Are Elected At Annual Meeting Held In Moose Jaw

Moose Jaw.—W. C. Heron, Huntown, was elected president of the Saskatchewan Sheep Breeders' Association, at the annual meeting held in Grant Hall Hotel.

Other officers of the association are: Charles Buffman, Bechar, vice-president; directors: I. J. Rushton, Rocanville; W. D. Lyon, Deveron; W. L. Morrish, Oxbow; James Whitehead, Nutana; A. Richardson, Semans; William Darnborough, Laura.

Of Advantage To Customers

London, England.—We have established during the year a bank in Canada, in the city of Montreal. We have every reason to be satisfied that this direct line will be of advantage to any of our customers carrying on business between Great Britain and growing markets of Canada, stated F. C. Goodenough, chairman of Barclay's Bank, Limited, in his address at the annual meeting of shareholders held here.

Named After Premier's Daughter

Towering 9,440 feet into the sky, the newly named Mount Ishbel, so called after Miss Ishbel MacDonald, daughter of the Labor Premier of Great Britain, is located about twelve miles west of Banff, in the Canadian Rockies, overlooking beautiful Mystic Lake. The Canadian Government have paid Miss MacDonald this graceful compliment in commemoration of her own and her father's visit to Canada last fall. The peak is visible from Massive, on the Canadian Pacific Railway, and also from the roadway between Banff and Lake Louise. Inset Miss Ishbel MacDonald.

TO WIDEN SCOPE OF ALBERTA HEALTH CLINICS

Calgary.—State medicine is certain to be established in Alberta "and everywhere else," according to Hon. George Hoadley, provincial minister of health, speaking to the annual convention of the United Farmers of Alberta. He admitted he had no apology to make for the accusation that his approval of public health clinics in Alberta is the thin edge of the wedge of state medicine.

Comment from the Alberta cabinet minister followed approval by the convention of a resolution widening the scope of the travelling health clinic in order to give free annual medical examination to every rural school child. Among a score of resolutions carried, was one favoring hurried completion of a Peace River rail outlet to the Pacific Coast.

The Peace River resolution urged the importance of fulfillment in the near future of Premier W. L. Mackenzie King's promise in 1924 that the line would be completed "as soon as humanly possible." Intention of the farm body will be communicated to the Dominion Government, the Canadian Pacific, the Canadian National and the Northern Alberta railways. It was stated that the route was now not financially difficult; that production of Peace River area has increased since 1924, and that 10,000 new homestead entries have been made in the district in the last two years.

A trio of resolutions directed to the Dominion Government favored decision by parliament, rather than by the Canadian prime minister in setting the date of Dominion elections; suggested legislation to require food products in containers to carry the name of their country of origin; and requested appointment of a committee to inquire into the feasibility of grading all products offered for sale in Canada.

Mr. Hoadley's forecast on the future of state medicine involved a statement that larger units than the municipality, as organized at present, would be necessary in development. He believed that the units would have to be large enough to be able to support equipment adequate for cure and prevention of disease. Previously, the convention had instructed the central U.F.A. executive to make a full investigation of state medicine in all its branches.

If the Alberta legislature provides the necessary finances, Mr. Hoadley mentioned, the Department of Health intends to employ a specialist in connection with examination of the eyes of children. He stated that since 1924, 24,000 school children have been treated by the public health clinics of the province, the only system in existence on the continent. Not a single death, he said, had resulted in this time, though 4,054 tonsil and adenoid operations had been effected.

Saskatchewan Resources

Provincial Government Will Not Agree To Commission Suggested By Premier King

Regina, Sask.—Saskatchewan will not agree to the commission suggested by Premier King in his proposals for the return of the natural resources. The Provincial Government suggests a commission of three; one chosen by the Federal Government, one by the Provincial Government, and a third commissioner chosen by either the Imperial Government or both the Provincial and Federal Governments. This commission would hear the claims of Saskatchewan for all alienations subsequent to 1905.

The Provincial Government is prepared to refer its claims to the Supreme Court of Canada, subject to an appeal to the Privy Council, should the contentions of the Provincial Government be upheld by the courts. The question of the accounting between 1870 and 1905 would then be referred to the chosen commission. On agreement being arrived at, the question of compensation and the amendment to the constitution would then be submitted to the Provincial Legislature at an early date that it might be given effect to by the Imperial Government.

New Nipawin Bridge Will Provide Gateway To Rich Area In Northern Saskatchewan

Faith in Canada's northern areas of resource becomes reality in the Canadian Pacific bridge now nearing completion at Nipawin, Saskatchewan. Designed to take the heaviest locomotives likely to be built, this magnificent structure, a little more than 1,907 feet long, spans the Saskatchewan River, at a point leading from the more definitely agricultural section into timber and mining districts of recognized magnitude. It will afford ready access to still unexplored farm lands and direct transportation possibilities for those who will explore and develop mineral expanses rich in promise. The end of the year saw it finished.

Among the major operations of the Canadian Pacific Railway for the year 1929, the Nipawin Bridge, begun in October, 1928, is one of the exceptionally large steel structures in the west. In symmetrical spans it connects north and south banks of the Saskatchewan at about 150 feet above water level of the river. It provides not only railroad transit calculated for 60,000 pounds axle load on the engine drivers, but is made in double-deck fashion with a sixteen foot highway for vehicular traffic on the lower chords, designed for fifteen ton loading.

This steel roadway, built on a creosoted understructure with a two inch untreated wearing surface, will carry the Saskatchewan Government's provincial highway across the river. Legislative forces co-operated with the railway company in relieving a situation which naturally proved a hindrance to agricultural development. Hitherto a ferry was required to convey travellers and vehicles across, a mode of travel full of difficulty by reason of the steep descents to the water level on both banks, a particularly serious condition in winter. At each end there is a trestle approach connecting the bridge roadway with the usual highway to the river. What this connecting link will mean in agriculture settlement and progress can scarcely be computed.

T. C. Macnabb, Engineer of Construction, describes this latest of Canadian Pacific bridge achievements in the west as of deck rivetted truss design with spans 280 feet long. The deck plate girders at the north approach are supported on steel towers each carried on low concrete pedestals. The abutments are of concrete and the four centre spans consist of deck trusses carried on reinforced concrete piers. The three centre piers are 130 feet high from the bottom of the footings and those connecting the outer spans are 120 feet.

Engineering skill of a high order has come into play in the construction of the Nipawin bridge. Mr. Macnabb explains that owing to the depth of the water in the turbulent and shifting Saskatchewan channel, vertical supports from the river bed were impracticable. The great 280 foot spans were built out by derrick car from each pier and were added to till the steel stretched horizontally and reached the supporting span at the end of the truss. More than 200,000 rivets have been driven by the air hammers in the field to take care of the eight and a half million pounds of structural steel required in the making.

The bridge has been built by assistant engineer H. D. Brydon-Jack, whose wife, an artist of ability, has painted it with its romantic environs so skilfully that she has produced an art subject of much beauty which is

"Don't worry if the boss called you an ass. I began as an ass and am now the boss's right hand man."—Hummel, Hamburg.

W. N. U. 1822

now on display in the Royal Art Gallery at Montreal.

Up where the Saskatchewan waters begin to slough their dun color and take on the blue of mountain streams, this fine structure becomes part of a landscape typical of the vigorous North-West.

When the project was first mooted, D. C. Coleman, vice-president of the Company's Western Lines, referred to this railroad-roadway as one of the finest structures of its kind—a main gateway to the North, and tangible evidence of the Canadian Pacific Railway Company's faith in the mineral and agricultural resources of Canada's great middle northern area.

A Challenge To the West

Western Canada Must Show Superiority Of Our Grain At World's Grain Show

"Mr. Craig, Deputy Minister of Agriculture, points out that the world's grain fair which is to be held in Regina two years hence will put Western Canada on trial as a grain-growing country. The prairie provinces have so persistently invaded Chicago and carried off honors at the International, that they have invited friendly reprisals. Every grain-growing state in the Union, and probably every outstanding grain-producing country in the world, will have exhibits at Regina. Canada's rivals are thus being offered an opportunity to 'carry the war into Africa,' and they have very substantial inducements to do so. If Western Canada can capture the awards at Regina that will be a more convincing demonstration of the superiority of our grain than the honors which have been brought back from Chicago. If outsiders carry away these prizes, the prestige of the grain-growing provinces will suffer in corresponding degree. The grain to be shown at Regina will have to be grown during the next two seasons. It is not too early to centre attention upon that event and begin to prepare for it.—Edmonton Bulletin.

Indigent Patient Problem

Question Is Discussed By Saskatchewan Medical Council

Efforts to solve what is known as the indigent patient problem have been commenced by medical men of Saskatchewan. While views of the physicians have not been given, the matter was discussed at the annual meeting of the Saskatchewan medical council.

The medical council spent much time on the problem of the relation of the medical man to the public, particularly in regard to indigent people.

"No scheme has been decided on," Dr. O. E. Rothwell, newly elected president, states. "A conference has been called for interested organizations in the province and we hope to reach a solution."

"The meeting will be held in Regina some time later this month. The United Farmers, municipal officers, medical men and other interested parties, will take part in the conference. The exact date has not been decided on."

Dr. Rothwell said that the matter was one of much interest to the medical council in the province and elsewhere in Canada. It is expected that it will provide one of the important discussions at the gathering of the British Medical Association which will be held at Winnipeg during August.

It is expected that a number of Saskatchewan physicians will attend the Winnipeg gathering. The association has met on one or two previous occasions in Canada.

Will Discourage Immigration

No Change Is Made In Quota Of Immigrants From Europe

No change has been made in the quota of colonists to be brought from central European countries in 1930, according to officials of the Department of Immigration and Colonization of the Canadian Pacific Railway at Montreal. The reply was given to the question of the number of Mennonite families coming to Canada this year. A conference between the railway officials and the Department of Immigration, of the Dominion Government, made allowances for a few Mennonite families last September, and since that time no changes have been made.

Canada Occupies Foremost Place Among Countries of the World In Systematic Seed Improvement

For Study Of Cancer

Colony Of Mice To Be Kept For Experimental Purposes At Laboratory In Maine

A city of mice—20,000 to 40,000 of them—will ultimately be under the eyes of scientists at the Jackson Memorial Laboratory, at Bar Harbor, Me., for the study of cancer. Clarence C. Little, director of the laboratory, and former president of the University of Michigan, has announced.

A complete record of the life history of each of the small rodents will be kept and although no startling or sensational results are expected, Mr. Little and members of the staff hope to learn some things that will aid in the fight against the disease.

Large Metal Shipment

Aluminum Slabs Valued At Over Million and a Half Shipped From Vancouver To Japan

Aluminum slabs and bars to the value of \$1,500,000, originating in the Province of Quebec, have been shipped from Vancouver to Japan. They represent the largest shipment of metal ever to leave the western port—being some 3,000 tons in weight—and it is reported that a second similar shipment will follow shortly. Another outward movement of some importance is that of lead and zinc concentrates from a mine near Field, B.C., to refineries in Japan and the United States. These shipments are likely soon to run from 5,000 to 10,000 tons per month.

Kept To Schedule

"When is the next train out of this burg?"

"Twelve o'clock, sir."

"What? Isn't there one before that?"

"No sir; we never run one before the next."

Many a man who imagines he is a wrestler can't even throw dice.

A new seed grain elevator, erected by the government of Canada at a cost of \$300,000, has just been opened formally for business in Moose Jaw, Saskatchewan. This addition to the machinery of the grain industry of western Canada is the first plant of its type to be constructed on this continent. It is a sixteen-storey building furnished with the most modern appliances for the handling and cleaning of seed grain and is capable of receiving such grain at the rate of 5,000 bushels an hour for storage in its bins. The plant has been erected for the Saskatchewan Registered Seed Growers, Limited. This organization is commonly known as the Seed Grain Pool. It numbers among its directors two celebrated growers of seed grain, J. C. Mitchell, of Dahinda, and Dr. Seager Wheeler, of Rosthern, both of whom have been winners in the past of the highest award for samples of hard spring wheat at international grain exhibitions in Chicago and, in consequence, have held for a season the title of "Wheat King" of America. The Seed Grain Pool, in Saskatchewan, has been in existence for five years and in that time has quadrupled the volume of its business.

The new plant in Moose Jaw thus will play a part in the operations of one group of workers in a very important branch of agriculture in Canada. Of such workers four or five thousand are enrolled in the Canadian Seed Growers' Association. This organization was formed for the purpose of promoting interest in the production and use of high-grade seeds on Canadian farms, and its members throughout the Dominion carry on their operations in accordance with certain rules. In a number of the provinces, too, subsidiary seed growers' associations have been in existence for a number of years. Members of these organizations have supplied seed of excellent quality to farmers in this country, the United States, Argentina and other countries. The government of Canada has provided for the testing and registration of seed grains and provincial governments, among them that of Ontario, have endeavored to provide the farmers with good varieties of grain and vegetables and to encourage them to see that their seed is clean and thus help to combat the spread of noxious weeds. L. H. Newman, the Dominion cerealist, wrote a few years ago that "among the countries of the world, Canada occupies a foremost place in regard to its organization both for systematic seed improvement and for handling high-class seed in commercial quantities under efficient control." This is as it should be, because clean seed of good varieties of plants and of a high standard of quality is necessary for the welfare of agriculture in this country. — Mail and Empire.

Limiting Fish Catch

Only Six Million Pounds May Be Taken In Lake Winnipeg, According To Ruling

The limitation on the catch of fish in Lake Winnipeg, has been set at 6,000,000 pounds for this season, according to an announcement by W. A. Found, Deputy Minister of Fisheries, at Ottawa. The limitation, which is in the discretion of the minister of the department, was originally set at 5,000,000 pounds. Mr. Found said that in succeeding seasons the figure would revert to 5,000,000 pounds.

Grasshopper mice were so named back in 1843 in North Dakota because their fondness for grasshoppers was noted.

"Lend me 5s. until Thursday."
"But suppose you die before then?"
"I am much too honest." — Pages Gales, Yverdon.

NEW BRIDGE ACROSS SASKATCHEWAN RIVER AT NIPAWIN

Where the new Nipawin Bridge spans the Saskatchewan it takes on the appearance of the artist's drawing at the top of the picture. Vehicular traffic will be carried in the space between the iron-work, and Canadian Pacific trains will travel on the top. (1) shows the pile driver at work in the year of construction. (2) In picturesque setting, the main piers of the structure are viewed from Ferry Hill in August, 1929, before the steel arrived. (3) The west towers almost finished December 13. (4) Looking across the completed bridge on the vehicular roadway which meets the Government highway at either end.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, marries Molly Winton, a ballad singer, not knowing he is loved by Grace Farrell, a little cigarette girl. After Al wins fame as a composer of popular songs, Molly elopes with John Perry, taking her baby, Junior. Al, broken by his loss, becomes a derelict, but is saved by Grace Farrell. Molly obtains a divorce. One night, while Al is appearing in a Broadway revue, he is called to a hospital by Molly because Junior is dying. After his boy's death Al breaks down on the stage while trying to sing. Months later he recovers from this blow. Then he and Grace are married at the Little Church Around the Corner.

CHAPTER XXXII.

Grace came out of the church door proudly, leaning on Al's arm, to face the news photographers who had, somehow, learned of the event. The cameramen did not have to tell Grace and Al to smile. Their faces were radiant. When this ceremony was over they stepped into a limousine and went whirling up the Avenue among the fantastic skyscrapers that seemed to Grace all rosy and pink against the deep blue afternoon sky.

And later?
Spring days came and the mellow approach of summer. Up and down Broadway and in all the cities, towns and hamlets stretching across the continent they were singing the songs Al had written—new songs that reflected the happiness of his new life with Grace.

Grace and Al lived in a tower apartment in one of the new Fifth Avenue buildings, forty floors above the roar of the city streets, with a little balcony that was like a hanging garden of Babylon. In the long early summer twilight Al and Grace could stand on that balcony and look down on the most fabulous city of any age. The rivers twined their silvery way on both sides of the island of Manhattan, the great liners came in from the sea, and Broadway at night cut, like a yellow streak, diagonally across the island.

"How strange to find me here," whispered Grace softly one evening, as she snuggled against Al's encircling and protecting arm. "I who worked at Blackie Joe's so long, and lived in the canyons, and saw the sky only in small patches. Now I'm on top of the world."

"On top of the world," Al repeated, tightening his arm about her waist. "Yes, that's where we both are, and that's where we're going to stay. But not in New York."

"Why not, darling?" Grace turned to him quickly.

Al's smiling eyes grew serious. "Because—well, I've been thinking Grace, I don't want us to stay around Broadway too long. Broadway's all right, and we've conquered it—thanks to you—but there are other parts of the world."

"That's true, Al. Do you want to go some other place to live?"

"Yes, why not. Yesterday, when the revue closed, I told Marcus I was through with the stage. No more burnt cork make-up, no more singing—that is, not professionally. I want to devote all my time to song writing, and I can do that anywhere. So—why not California?"

"To live?"

"Yes, to live. Do you think you'd like it?"

"I'd love it!"

"Then that's agreed." And Al leaned over and kissed Grace. "We'll live in California and whenever we want to come back to Broadway we can. It will be new to us and we'll have a swell time seeing the sights. And if we want to go visiting to the Alps, or to India, or China, or the South Seas—we can. In fact, we'll go anywhere your little heart desires."

Spring days, summer days and two figures, small in the distance, standing on that high balcony, talking in whispers of their love and their life in the future, which seemed to stretch before them like a silver highway melting into the mist. And then

Night on Broadway once more, with the expensively garbed after-theatre crowds drifting into the Club Bombo. The name was the same, but there were new owners, and a new master of ceremonies.

The jazz band played, the dancers swayed, and the master of ceremonies exhorted everybody to be friendly and have a good time. When the music ended and the couples left the floor the master of ceremonies looked about for a celebrity to introduce. Finally he found one and caught the attention of the crowd.

Ladies and gentlemen, he called through his tiny megaphone, "we are especially honored tonight by the presence of that famous star and songster—Broadway's 'Singing Fool!'"

Al and Grace occupied a table against the far wall. As the spotlight shot across the room and found them, Al rose slowly in response to Grace's urging. There was the old roar of applause that had greeted him so many times in this place, and calls for a speech and a song. He raised his hand and the room became silent.

"Ladies and gentlemen," he began, "as most of you know, this is where I had my first taste of success as master of ceremonies. So it's only right I should come here to say goodbye. As I bowed in, so shall I bow out. To my pals and the place that treated me so kindly I have only the best in my heart."

"Somebody once said, 'Go west, young man,' and I'm taking that advice. Broadway's been both my menace and my playmate. Tonight we are parting—friends. I'm going west accompanied by the little girl who has stood by me so loyally, Grace Farrell Stone—my wife!"

Once more the thunderous applause and once more Al's raised hand, requesting silence.

"I don't want you to think I'm giving up song-writing. I shall continue to write songs and someone else will sing them. And folks—if any of you come to California I want you to visit Grace and me. You'll find us not in a little gray cottage, but in a forty-two room chateau by the blue Pacific, with a Jap valet and a polo pony or two. If we're not in, the butler, or the second man will tell you where to find us. . . . May you sleep well and laugh in your dreams. Goodbye."

The crowd liked Al's humorous speech, but still the voices rose, demanding a song. "Sing to us, Al," they called. "Just once, for old time's sake."

Al turned to Grace: "What shall I give them?"

Grace blushed slightly. She had been thinking of a song she wanted him to sing, but she didn't know whether she could muster up courage to ask him. But finally she said: "Al, do you remember the first ballad you ever sang—down at Blackie Joe's?"

"Of course I do. But I shall sing it to you as well as to them."

He walked across the room and stood beside the piano, just as he had done that night four years ago at Blackie Joe's. Grace saw him confer with the pianist, then turn to face the audience. Then the familiar music came toward her, with Al singing the words—the poignantly appealing words of "Always."

They seemed to come winging straight to Grace in the stillness of the big room—words she knew by heart, words that had once meant pain to her. She knew she would never forget how Al had once sung them to another woman—Molly—while she, Grace, had stood against the wall at Blackie's club, her tray of cigarettes before her and her eyes fixed on the handsome young singer, in complete adoration. How she had suffered that night, knowing the man she loved was pouring out his heart to the other woman!

Again the song ended in a moment of breathless suspense, to be followed by ringing applause. And Al, slowly wending his way among the gay drinkers and diners, who reached out to shake his hand and pat him on the shoulder, finally reached Grace.

"How was it?" he asked, his eyes aglow with love for Grace.

"Marvellous!"

"Grace," he said softly, "it's your song. All yours!"

When the audience had turned its attention to the floor show Grace and Al slipped out of the club. They strolled arm-in-arm down Broadway. Above their heads was the the razzle-dazzle of many-colored lights and still higher the soft and friendly twinkle of the stars.

THE END.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Little Helps For This Week

"All things work together for good to them that love God."—Romans viii. 28.

O what a load of struggle and distress
Falls off before the Cross! The feverish care;
The wish that we were other than we are;

The sick regrets; the yearnings numberless;
The thought, "this might have been," so apt to press
On the reluctant soul; even past despair,

Past sin itself,—all, all is turned to fair,
Aye! to a scheme of ordered happiness,
So soon as we love God.

—Chauncy Hare Townshend.

Those who love God will find all things working together for their good. Everything helps them, as sunshine or storm, summer or winter, helps the tree. When the sun shines warmly, the tree opens all its buds and leaves and drinks in the warm air, and grows. When the cold storms of winter beat upon it, it withdraws into itself, and shuts its pores, and tightens its hold by the roots, and hardens. So when all things are pleasant in life we enjoy them gratefully, and expand in God's sunshine with thankful hearts. When disappointment and trial come we learn to be patient, trusting, submissive, hopeful, firm, and true, and that is good for us also.—James Freeman Clarke.

Japan's population is estimated to have increased by 1,000,000 in the last year.

Advises Against Skyscraper

American Architect Tells London Builders To Avoid Them

An American architect, who builds skyscrapers, has advised British architects not to erect any in London.

William A. Delano, president of the New York branch of the American Institute of Architects, speaking before the Architecture Club in London, England, said he felt that Americans "are gradually being crushed by these monsters which have made life about as sterile as it can possibly be for the ordinary man."

"I hope you will not be captivated by this particular phase of our experiment," he said. "Unless you are ready to swallow our civilization whole it would seem a mistake to copy any part of it."

THE RESPONSIBILITY OF A FOND MOTHER

Her child is a never-ending source of joy and a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her; she does not know just what to do, yet feels them not serious enough to call a doctor. At just such times as these it is that Baby's Own Tablets are found to be mother's greatest help and friend.

Most childhood ailments arise from a derangement of the stomach or bowels. Baby's Own Tablets will immediately banish them by cleansing the bowels and sweetening the stomach. Thus they relieve colic, correct the digestion, banish constipation and make teething pains disappear.

Baby's Own Tablets are guaranteed to be free from injurious drugs such as opiates and narcotics and may be given to the newborn babe with perfect safety and beneficial results. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Fashions and Freedom

Men More Concerned Than Women About Correct Clothes

That all women are, as a matter of course, terribly excited over matters of style in dress and "the latest thing," and all men are sublimely indifferent is nonsense. If there is any part of the esteemed human race that has a more mortal terror of being seen in habiliments that are not what "they" are wearing it is certainly the masculine half. Because the style of men's clothes is based on the idea of lack of change is no valid argument that there is a "fundamental psychic difference." The code is different, that's all. That men have achieved the time-saving idea of an unchanging mode is, anyway, largely a matter of luck, more than careful planning.

Appointed To Supreme Court

Mr. Justice Cannon, Of Quebec Court Of Appeals, Is Selected

Mr. Justice L. A. Cannon, of the Quebec Court of Appeals, has been appointed a justice of the Supreme Court of Canada. The appointment of Mr. Justice Cannon fills the vacancy caused by the retirement of Mr. Justice Mignault. No successor has yet been selected for Justice Cannon on the Quebec Court of Appeals.

Announcement of the appointment was made by Hon. Ernest Lapointe, Minister of Justice, following a meeting of the cabinet at Ottawa.

Killed By Sharks

Unfortunate Victims Were Shipwrecked In Squall In Southern Seas

A message from Port Louis, in the Island of Mauritius, reported that five persons had been killed by sharks in the Bay of Tamorino, after their motorboat capsized in a squall.

The five were members of a party of six engaged in shark fishing. They all attempted to swim to shore, which was two miles away, but the sharks caught all but one.

Forests cover 22 per cent. of the area of California.

DON'T MISS IT

THE ROARIN' GAME AND THE GAME OF LIFE

At the request of a number of the citizens of Carbon we publish below the text of the sermon that was preached at the United Church last Sunday evening by the Rev. Wm. McNichol, Chaplain of the Carbon Curling Club. This was a special curler's sermon and over three fourths of the curlers were present.

Part One

Paul was the first Christian leader who dared to couch the gospel in the sporting vernacular of the day. His example has always seemed so daring that it has not challenged much general imitation. Now, however, with athletic contests occupying so large a place in the normal mind of both men and women, preachers are beginning to return to the example of Paul, and are seeking to attract the exuberant spirits of athletes and their followers to the matchless game of the christian life.

Paul never allowed his followers to think that the christian life was an easy thing. He often reminded them of the severity of the contest; the necessity for careful training; and for self denial and self mastery; if success was to be the goal attained. Tonight I would venture to direct your attention to the old Isthmian stadium, and all that it stood for, and invite you to consider with me some of the wholesome lessons which more modern games of skill tend to teach.

Taking curling as an example of modern games of skill, we find that Scotland is by many supposed to be the cradle of the game. It is true that for the last three hundred years curling clubs have been numerous in that land, and that from Scotland the game was carried to Canada and to several other countries, but about the origin and early history of the game very little is known. The preponderance of opinion seems to point to Flemish origin, and to indicate that the game was introduced into Scotland sometime in the sixteenth century.

Curling is a clean and healthy game, and perhaps as interesting a game of skill as can be found anywhere. It has

been called a gentleman's game, and I think we can honestly say, that the manner in which it is usually played warrants the sobriquet.

Curling like the game of life is much as we make it. It is a fascinating game, and for those who do not know the lure of the "Witch's channel stone," curlers usually have an almost infinite pity which has been humorously expressed in the following lines: "Nae game can mak' your blood run quick, As when ye draw a port or wick, Or run the winner out and tick Upon the tee—That's curlin' Oh hapless wretch who ne'er has known

The music of the curlin' stone To heavenly songs ye'll no be prone That's what ye'll lose—no curlin'.

Curling has been called the "roarin' game." The roaring adds to the enjoyment. Some object to calling "whoa" "whoa," or "go on" "go on," to a senseless stone, but let them object. Who cares? The roar to the curler is what the bagpipes are to the Highlander going into action. It also reveals to his skip the intense enthusiasm of his team-mate, and the skip knows that where there is so much bottled up enthusiasm, there is a man who can be depended on to do his best. A good wholesome roar won't hurt anybody, and it often furnishes entertainment for the onlookers.

One great element that makes for success in this game is in doing unquestioningly whatever your skip directs. The skip is the captain of his rink. The other players may or may not understand what he is aiming at, but it is not theirs to ask the reason why—it is theirs to do or die. I have known rinks composed of men who might be considered the pick of their club, but because each man thought he knew better than his skip how the game should be played, the esprit de corps was lacking, as a consequence they failed to achieve the success that otherwise would have been theirs.

It may seem strange to those unfamiliar with the points of this game for me to say that when a body of men or women binds themselves together as a club in order to compete in games of skill, such as curling, that their aim and object usually is to foster the spirit of good fellowship,

and to develop sportsmanlike qualities in each other. You may be tempted to think that in a game of skill where one group is pitted against another group, that a spirit of antipathy would be fostered, but in curling such a spirit is seldom in evidence. Honest competition conducted according to well established rules between

(Continued on inside page)

Carbon, Alberta.

NOTICE OF VILLAGE MEETING

NOTICE IS HEREBY GIVEN that a meeting of the electors of the Village of Carbon will be held at the Elks hall, Carbon, at seven o'clock p.m., on Monday the third day of February, 1930, for the discussion of the affairs of the Village; and that from eight o'clock p.m. to nine o'clock p.m. on the same day and at the same place, nominations for the office of Councillor will be received. (one councillor to be elected).

ALEX REID,
Secretary-Treasurer

The Village Council have authorized the Dog Catcher to destroy all dogs not licensed after January 31st. Dog owners or harbourers of dogs who wish to save their pets are asked to procure a license from the Secretary-Treasurer of the Village immediately.

All persons wishing to continue in the dray business must have their license on or before January 31st, 1930, or quit Draying.
